What Is The Golden Ratio?

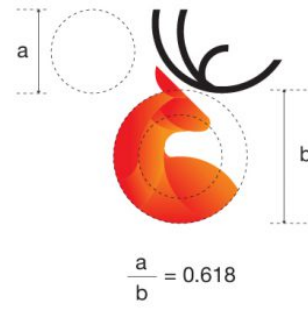

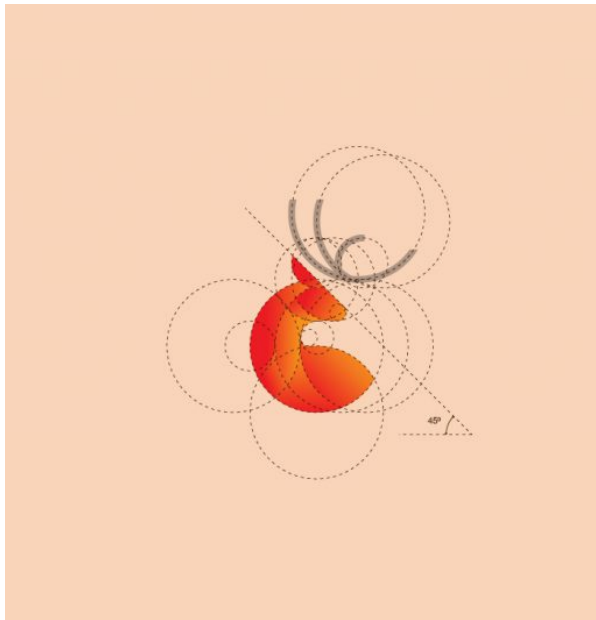

The Golden Ratio is a mathematical ratio. It is commonly found in nature, and it can also be used to achieve beauty, balance and harmony in art, design (such as: architecture, logos, UI Design...) and photography. It is a special number found by dividing a line into two parts so that the longer part divided by the smaller part is also equal to the whole length divided by the longer part.

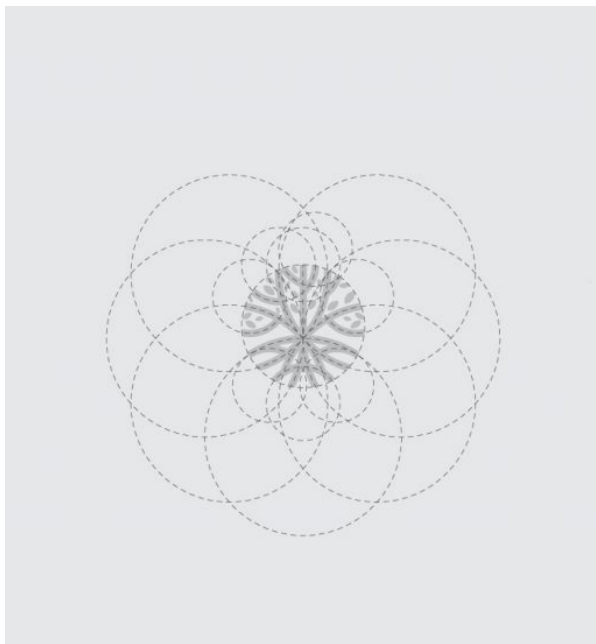

A Fibonacci sequence starting with 0 and 1. The previous two numbers are added together to produce the next number in the sequence: 0, 1, 1, 2, 3, 5, 8, 13, 21, ... and so on to infinity.

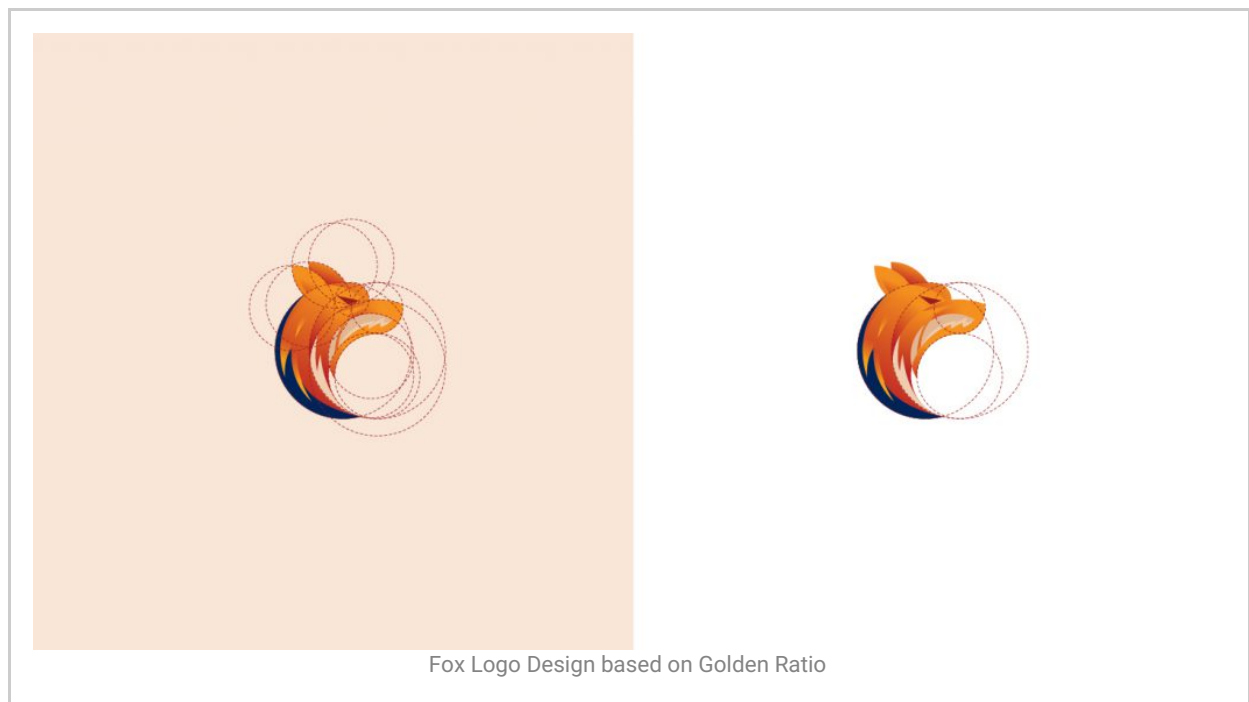

Here are some examples of logos designed according to the Golden Ratio by Dainogo

Deer Logo Design based on Golden Ratio

Green Tree Logo Design based on Golden Ratio

How to create Golden Ratio grid?

Let's start by creating a golden rectangle. To make this simple, I'll start with a width of 1000 pixels and height is 618 pixels. Then add a 618 x 618 square on the right side of the canvas, then a 382 x 382 square... and so on.

You can download the golden ratio grid [**AT HERE**](#)

Don't forget to follow me on [**Youtube**](#) and learn more about logo design, golden ratio...
